
Morgan Dollar Value Trend Report

www.us-coin-values-advisor.com

The Morgan Silver Dollar

The Morgan Silver Dollar is today one of the most popular collector coins. First minted in 1878 following the passage of the Bland-Allison Act, the new dollar was named after its designer, United States Mint Engraver George Morgan. You can learn more about the history of the Morgan Dollar by clicking this link: www.us-coin-values-advisor.com/Morgan-Dollar-Price-Guide.html

Collectors with numismatic ambitions plus a desire to own coins destined to increase substantially in the years ahead will find some opportunities for doing so with the Morgan Silver Dollars. As usual, coins that have shown the strongest gains in the past are the coins most likely to produce similar results in the long term future. This is primarily due to consistent demand from collectors. The "Collector Index" color indicators on the bottom row of every Value Table attempts to gauge collector interest. It is a quick way to zero in on Morgan Dollars with the best future prospects. Dates with lots of reds and yellows have lesser potential, based on a sluggish price increase history, while those with many green indicators deserve first consideration. The "Collector Index" is explained in more detail a couple of pages below.

Morgan Dollars are perhaps the most visible group in all of American numismatics, and have been for a long time. Trying to cash in on the Morgan craze, promoters of dubious character over hype the coin, even common date material, as a top notch investment. Buyers taken in by all the hoopla are disappointed if they were expecting stratospheric returns on their money.

A favored technique of the fly-by-night crowd is to push an overgraded coin onto a trusting buyer. When the duped buyer tries to sell, (s)he's disgusted to learn the "MS-65" coin is really an MS-63 by accepted numismatic standards. The safest policy to guard yourself against this rip-off is to purchase high-dollar examples only if they have been graded by PCGS, NGC, ICG, or ANACS, or are being sold by a reputable dealer.

In summary, our advice is to buy properly graded Morgan Dollar dates that have demonstrated popularity with collectors over a long period of time, if value appreciation is important to you.

The photo above taken at the New Orleans Mint in 1897 shows a workman punching out silver dollar blanks, 20 to a strip. A total of 4,004,000 Morgan Silver Dollars were produced at New Orleans in 1897. Image courtesy of Library of Congress.

How to Use the Coin Value Tables

1909-S
Mintage: 1,825,000

Lincoln
Historical Value

Year	G-4	VG-8	F-12	VF-20
1950	0.65	0.85	1.00	1.50
1955	2.00	3.00	3.50	4.00
1960	7.50	9.00	11.00	15.00
1965	30.00	32.50	42.50	50.00
1970	20.00	22.50	25.00	30.00
1975	23.50	25.00	30.00	35.00
1980	27.50	30.00	35.00	40.00
1985	40.00	42.50	50.00	55.00
1990	35.00	40.00	45.00	50.00
1995	35.00	42.50	47.50	50.00
2000	35.00	42.50	50.00	55.00
2003	65.00	75.00	100.00	125.00
2006	85.00	100.00	125.00	150.00
2008	125.00	135.00	150.00	175.00

Collector Index:
Computed from year indicated in left-most column

Year	G-4	VG-8	F-12	VF-20
1950	9.49	9.13	9.02	8.80
1980	5.56	5.52	5.33	5.92
1995	10.29	9.30	9.25	9.70
2003	13.97	12.47	8.45	5.92

Collector Index: B B B B

Grade:
Indicates coin grade, based on the ANA scale. Example: G-4 stands for Good-4

Value:
The example circled indicates this coin was worth \$42.50 in VG-8 condition in the year 1985.

Return Rate %:
Shows the effective % annual return rate, from the year in the far left column to the present. The examples circled indicate this coin in F-12 advanced at a rate of 9.02% annually from 1950 to 2008. The coin grew at an annual rate of 8.45% from 2003-2008.

More About the "Collector Index"

As an added bonus, we've developed a feature exclusively for the download reports called the "Collector Index", the purpose of which is to gauge the level of collector interest for a given coin across the full grade spectrum. The idea of the index is to help the coin collector interpret the data tables faster.

A high score suggests the coin attracts keen attention within the numismatic community, translating to good potential for solid future value growth; a low score means to expect a comparatively slower performance in the coin price guides.

Another way of looking at it is the "Collector Index" points out Blue Chip coins, based on proven value trends over a long period of time.

The Index is located at the bottom row of every Coin Value Table in the downloaded version, and it is not included in the free online reports.

Here is a blown up snippet of what the Index looks like:

Compounded Annual % Return Rate Since...
Computed from year indicated in left-most column to

Year	G-4	VG-8	F-12	VF-20	XF-40	1:
1950	9.37	9.11	9.04	9.09	9.17	
1980	5.52	6.09	6.07	6.35	6.25	
1995	7.54	8.09	8.65	8.67	8.02	
2002	13.83	14.87	13.97	14.67	13.40	1:
Collector Index:	B	A	A	A	A	

The Collector Index score is based on two measures:

(1) Percentage Return Rates.

Strong value increases consistently over long periods of time carry the biggest clout in this component of the Index.

(2) Current price range.

Coins with bigger price tags have a better chance of earning a good Index score compared to lesser coins. Why is this? Consider a coin that doubles in value from \$10 to \$20 over a five year period; in effect, it compounded annually at a rate of 14.67% over the five years. Nice, but who gets excited about a \$10 gain? On the other hand, a coin that doubles from \$250 to \$500 over the same time is something to get jazzed about!

The "Collector Index" Scorecard

Collector Index Scorecard	
A	Highest score possible: generally an indication of true rarity and certain to ignite fierce bidding amongst collectors nearly every time offered for sale.
B	A very good score: most likely destined to forever remain popular with collectors, placing consistent upward pressure on pricing.
C	So-So score: won't initiate a lot of enthusiasm, but will always have a coin collection value because needed to complete a set.
D	Low Score: In lower grades, contains some degree of numismatic value, but value is largely based on silver content; in higher grades, characterized by plentiful supply and slow price advancements.
F	Not Applicable. Our philosophy is that we do not attach a failing score to any coin we report on. We respect too much these artifacts from bygone eras to in any way insinuate they're worthless in today's world. Many of you probably feel the same. Who among us wouldn't skip a heart beat upon spotting a worn 1936 Lincoln Cent in pocket change?
